Paul Graham Raven is a writer and critical futures researcher, whose research is concerned with how the stories we tell about times yet to come shape the lives we end up living. A former Marie Skłodowska-Curie Postdoctoral Fellow, he's also an author and critic of science fiction, an occasional journalist and essayist, and a collaborator with designers and artists. He currently lives in Malmö with a cat, some guitars, and sufficient books to constitute an insurance-invalidating fire hazard.
